Integrated Cover System Design Project 95 Percent Design Package Rocky Mountain Arsenal

The U.S. Army has reissued the Integrated Cover System Design (ICSD) Project 95 percent design package. This design describes the Resource Conservation and Recovery Act equivalent covers, with modifications made to the original design, that will be constructed over four Arsenal project sites – the Complex (Army) Trenches, Basin A, Lime Basins, and South Plants. The design also describes soil covers that will be constructed in South Plants Balance of Areas and the Shell Disposal Trenches Project area.

The On-Post Record of Decision (ROD), which was signed by the Army, the State of Colorado, and the U.S. Environmental Protection Agency (EPA) on June 11, 1996, provides a detailed description of the cleanup approach selected for the Arsenal.

This 95 percent design package, the Administrative Record, the RODs, and Post-ROD documents supporting the cleanup, are available at the Arsenal's Joint Administrative Record and Document Facility (JARDF), 303-289-0362, open M-F 12-4:00 p.m. and by appointment and at the EPA Superfund Records Center, 303-312-7287, open M-F 8 a.m. - 4 p.m.

Comments on this Integrated Cover System Design are requested by May 7, 2007. *Written questions/concerns should be directed to: Ms. Peggy Machamer, RVPRO, RMA, Building 111, Commerce City, CO 80022-1748; by e-mail pao@rma.army.mil or by phone at 303-289-0300.*
